

Career Opportunities in Psychoneuroendocrinology

B. Derntl, I. Sundström Poromaa, V. Frokjaer, V. Engert, B. Pletzer, R. Shansky, A. O'Donovan, R. Heringa, J. Sacher.

In this career-development workshop, our panel of international faculty and students will interactively explore questions like: what constitutes a successful mentor-mentee relationship, how to best prepare for an interview for a PhD or a post-doc position, how to manage collaborations with a previous supervisor when moving to the next position, etc. In addition, open positions in the fields of neuroendocrinology, stress and trauma research, early psychosis prevention, and aggression and impulsivity will be advertized.
